HUXWRX Safety Co. Donates To The “Teen Project”

HUXWRX Safety Co. helps kick off the latest KSF fundraiser.

5/11/22 Eugene, OR

The Kids S.A.F.E. Foundation is excited to announce that HUXWRX Safety Co. has donated (4) Rad 22 suppressors to kick off our latest Kids S.A.F.E. Foundation fundraiser 2022. This is the first part of the “Teen Project.” We are hoping to raise enough funds to upgrade the rifles that we use to educate the students and help with the development and implementation of our new “Teen Rifle and Pistol” Classes. The rifles we use currently have been in service for nearly 6 years and it’s time to upgrade as we continue to expand. It is our goal to transfer the rifles we use currently to Hawaii for use with the KSF Hawaii chapter. The HUXWRX donation of their innovative and quality suppressors will help tremendously with the safety of the students, by helping to protect their hearing. This investment in the Kids S.A.F.E. Foundation will help give our organization the tools needed to continue to grow and reach more families. This donation shows great responsibility from a manufacturer by supporting a kids firearm safety organization.

Since the founding of the Kids S.A.F.E. Foundation, back in 2016, we have reached over 25,000 kids in 5 states and taught them lifesaving skills. The Teen Project fundraiser will help us purchase the equipment necessary to implement (2) new classes geared towards teenagers. The goal is to further promote responsible gun ownership, safety, and to encourage the next generation to get involved in the shooting sports. The new Teen classes will focus on safety, safe gun handling, and marksmanship. Teenagers are future voters and it is important as a community we engage with them and teach them these valuable life skills and traditions.

HUXWRX Safety Co. was originally introduced in 2009 as OSS. In 2021 they transitioned from OSS to HUXWRX Safety Co. in a continued effort and commitment to build quality safety systems to protect their customers. Their design and technology is truly innovating by helping increase the safety of the user by lowering the decibel level of the gun shot but by also limiting the amount of gas directed back towards the shooter’s face. They have quickly become the gold standard for suppressor designs. We are thankful for their support. Please stay tuned for future updates as we continue the roll out of this project. ZERO firearm accidents is the only acceptable goal!!!®
